## USER MANUAL GUIDE

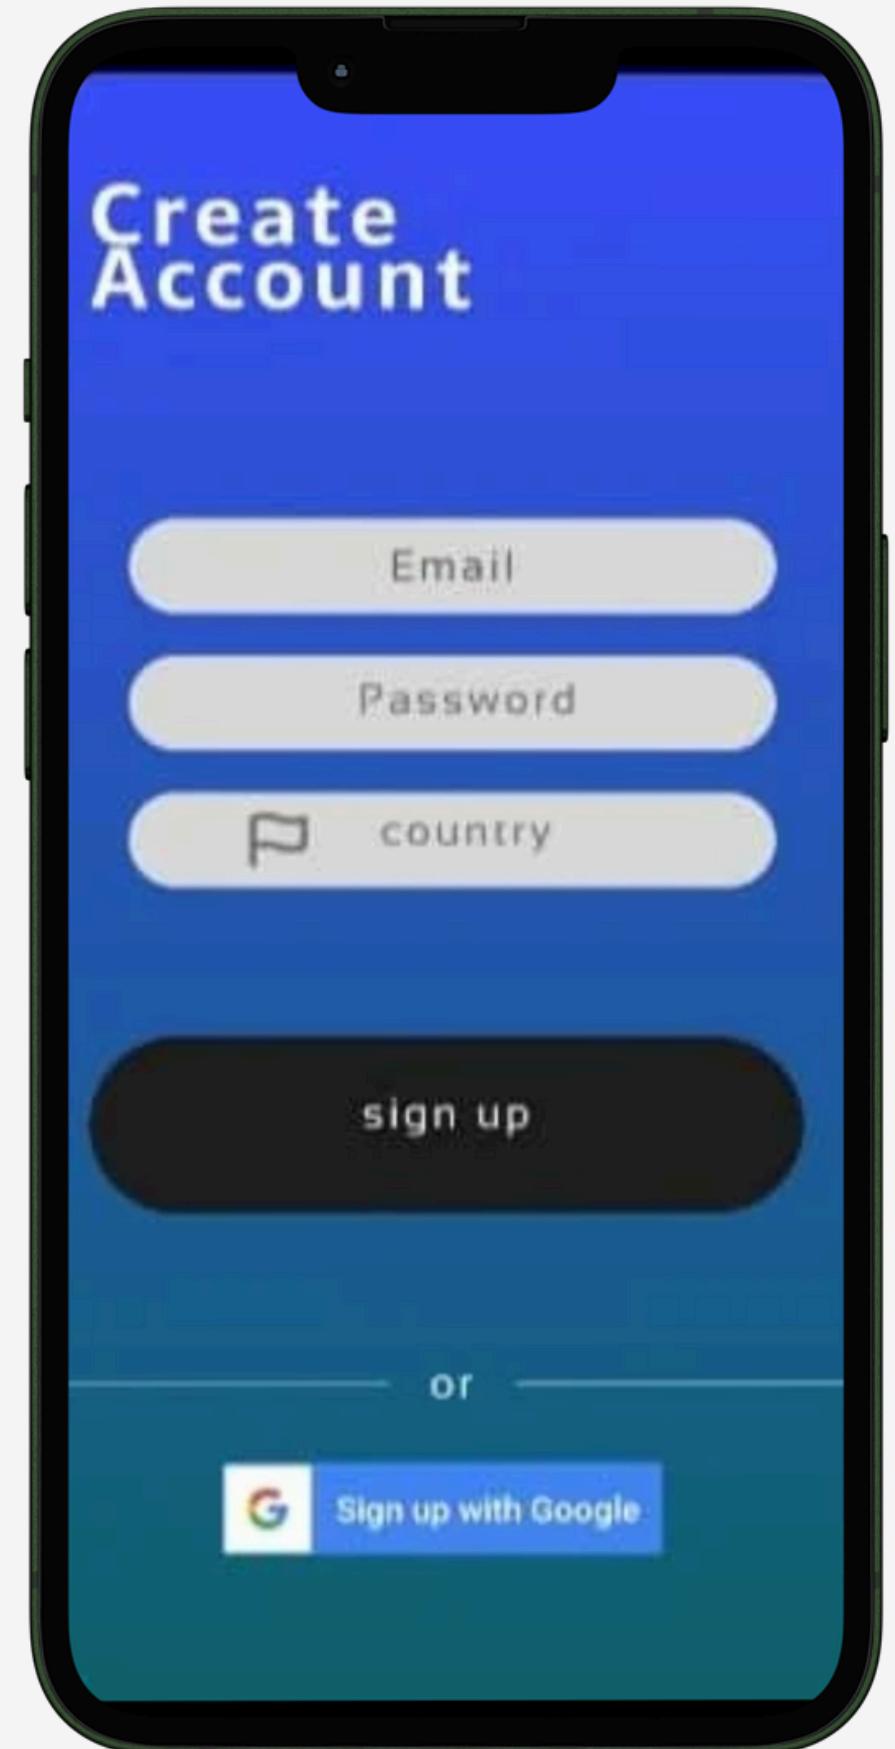

# About the Application

Making an application for our product is a way to ease the process of customers buying our products. For this application, we aim for it to be user friendly to ensure smooth progress when buying our product.

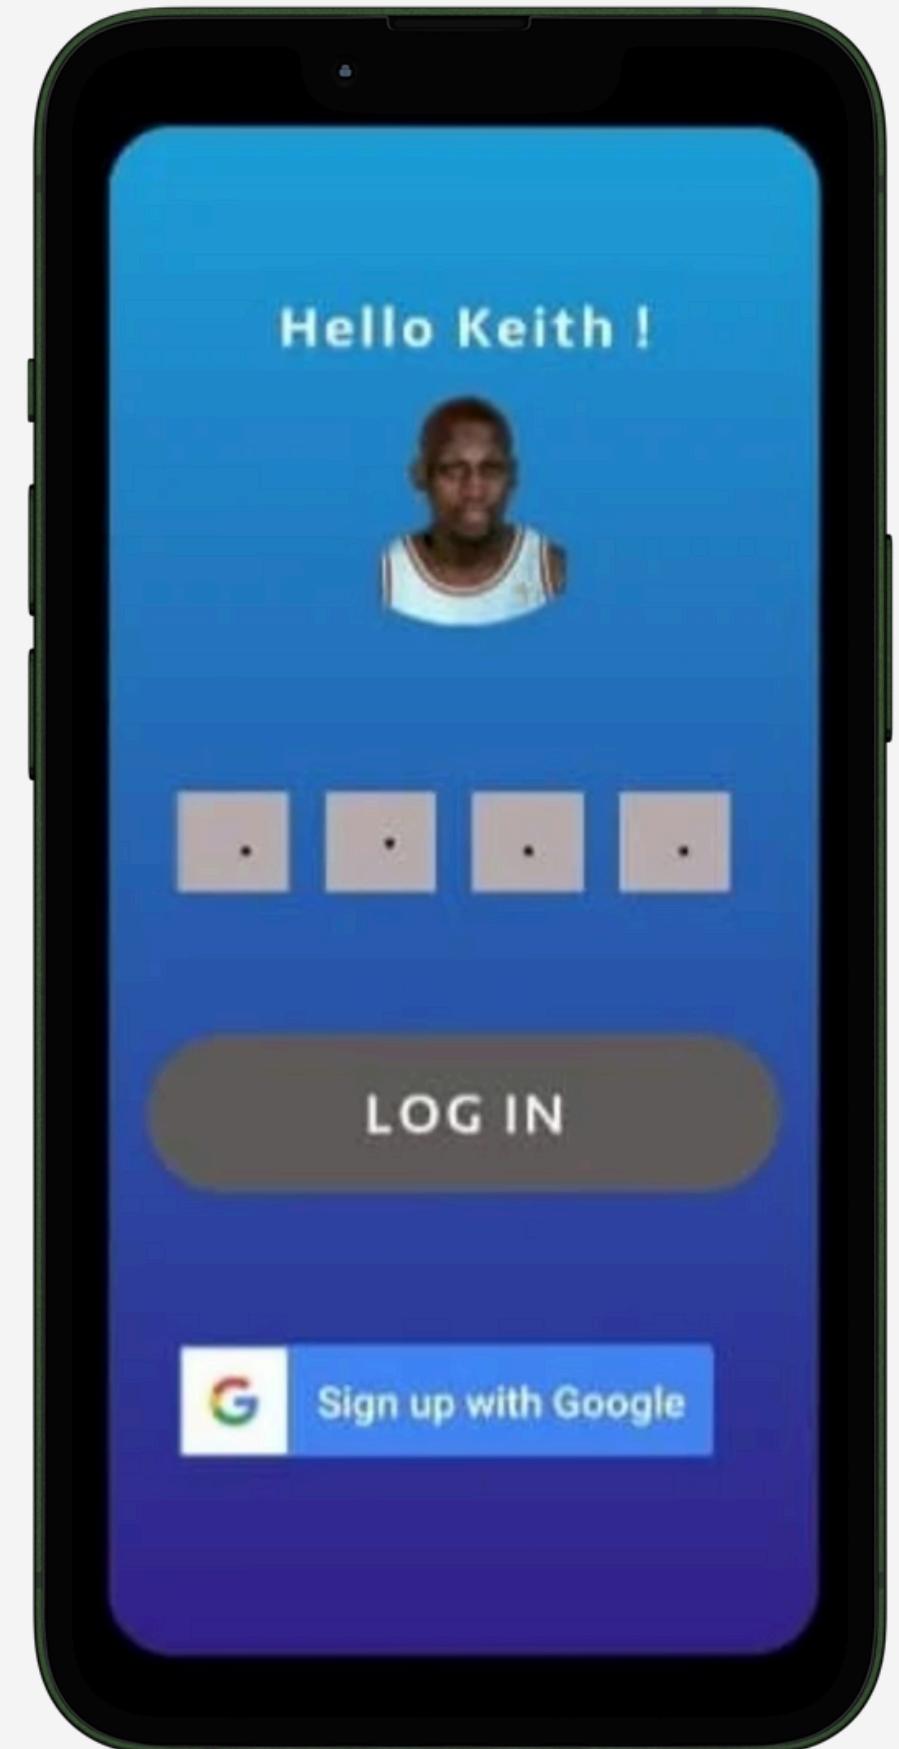

# SIGN UP PAGE

The first page you will encounter for the app is the sign up page. This is where user can make an account to access our application. User will be asked to input their email, password and their country of origin to complete making an account.

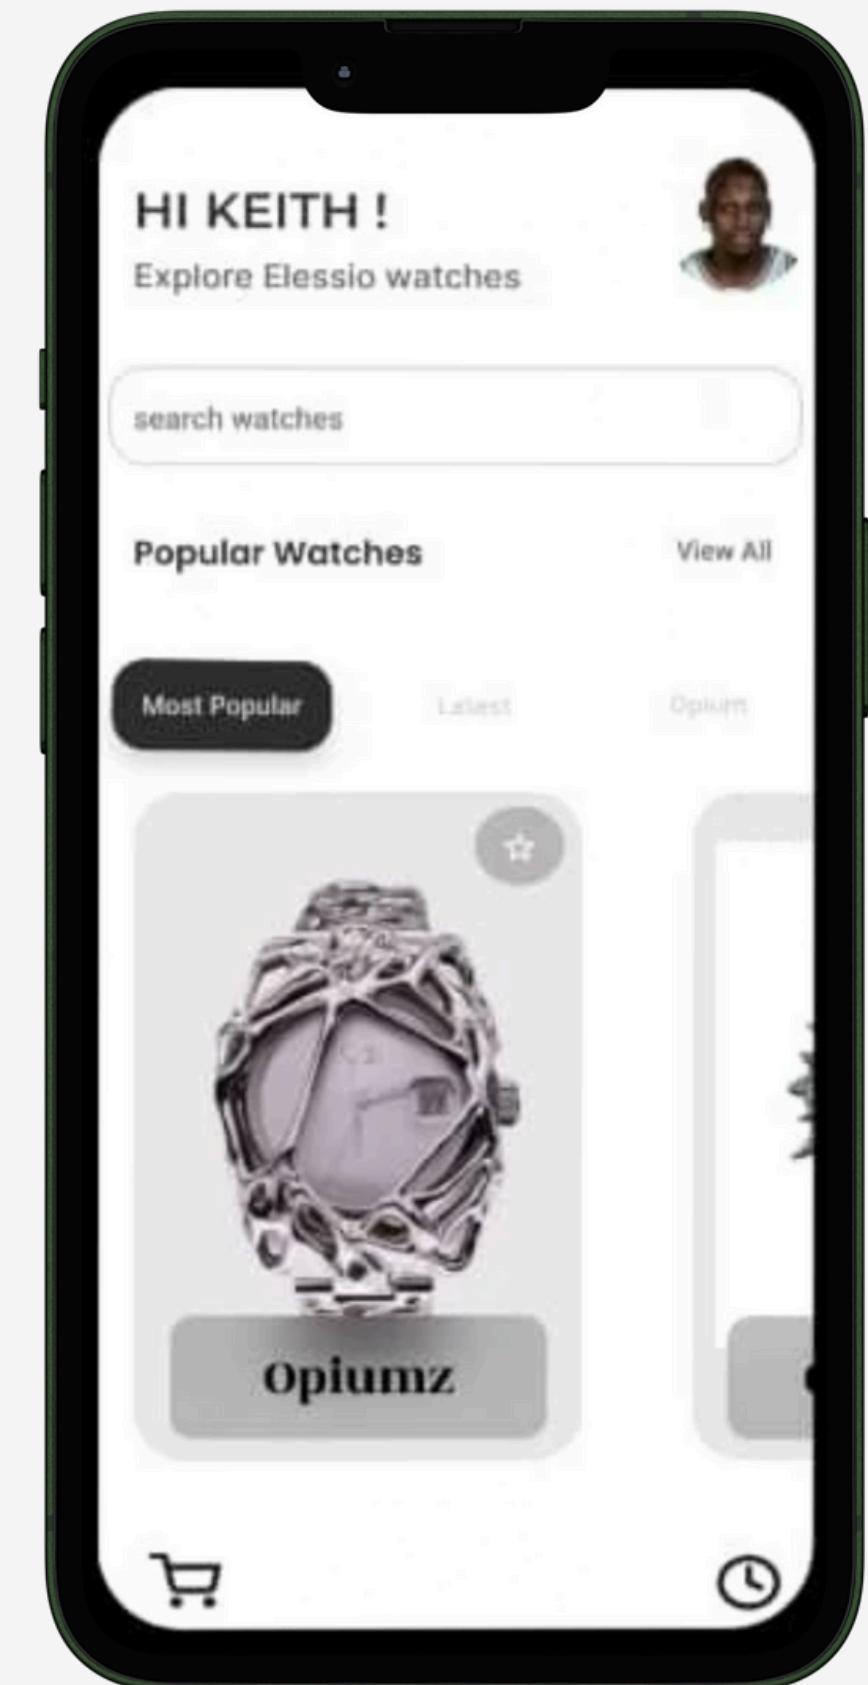

# LOGIN PAGE

After making an account, user can then login to their respective account. User's icon and name will pop up for them to identify their account. The last step into accessing our app is to put their account password.

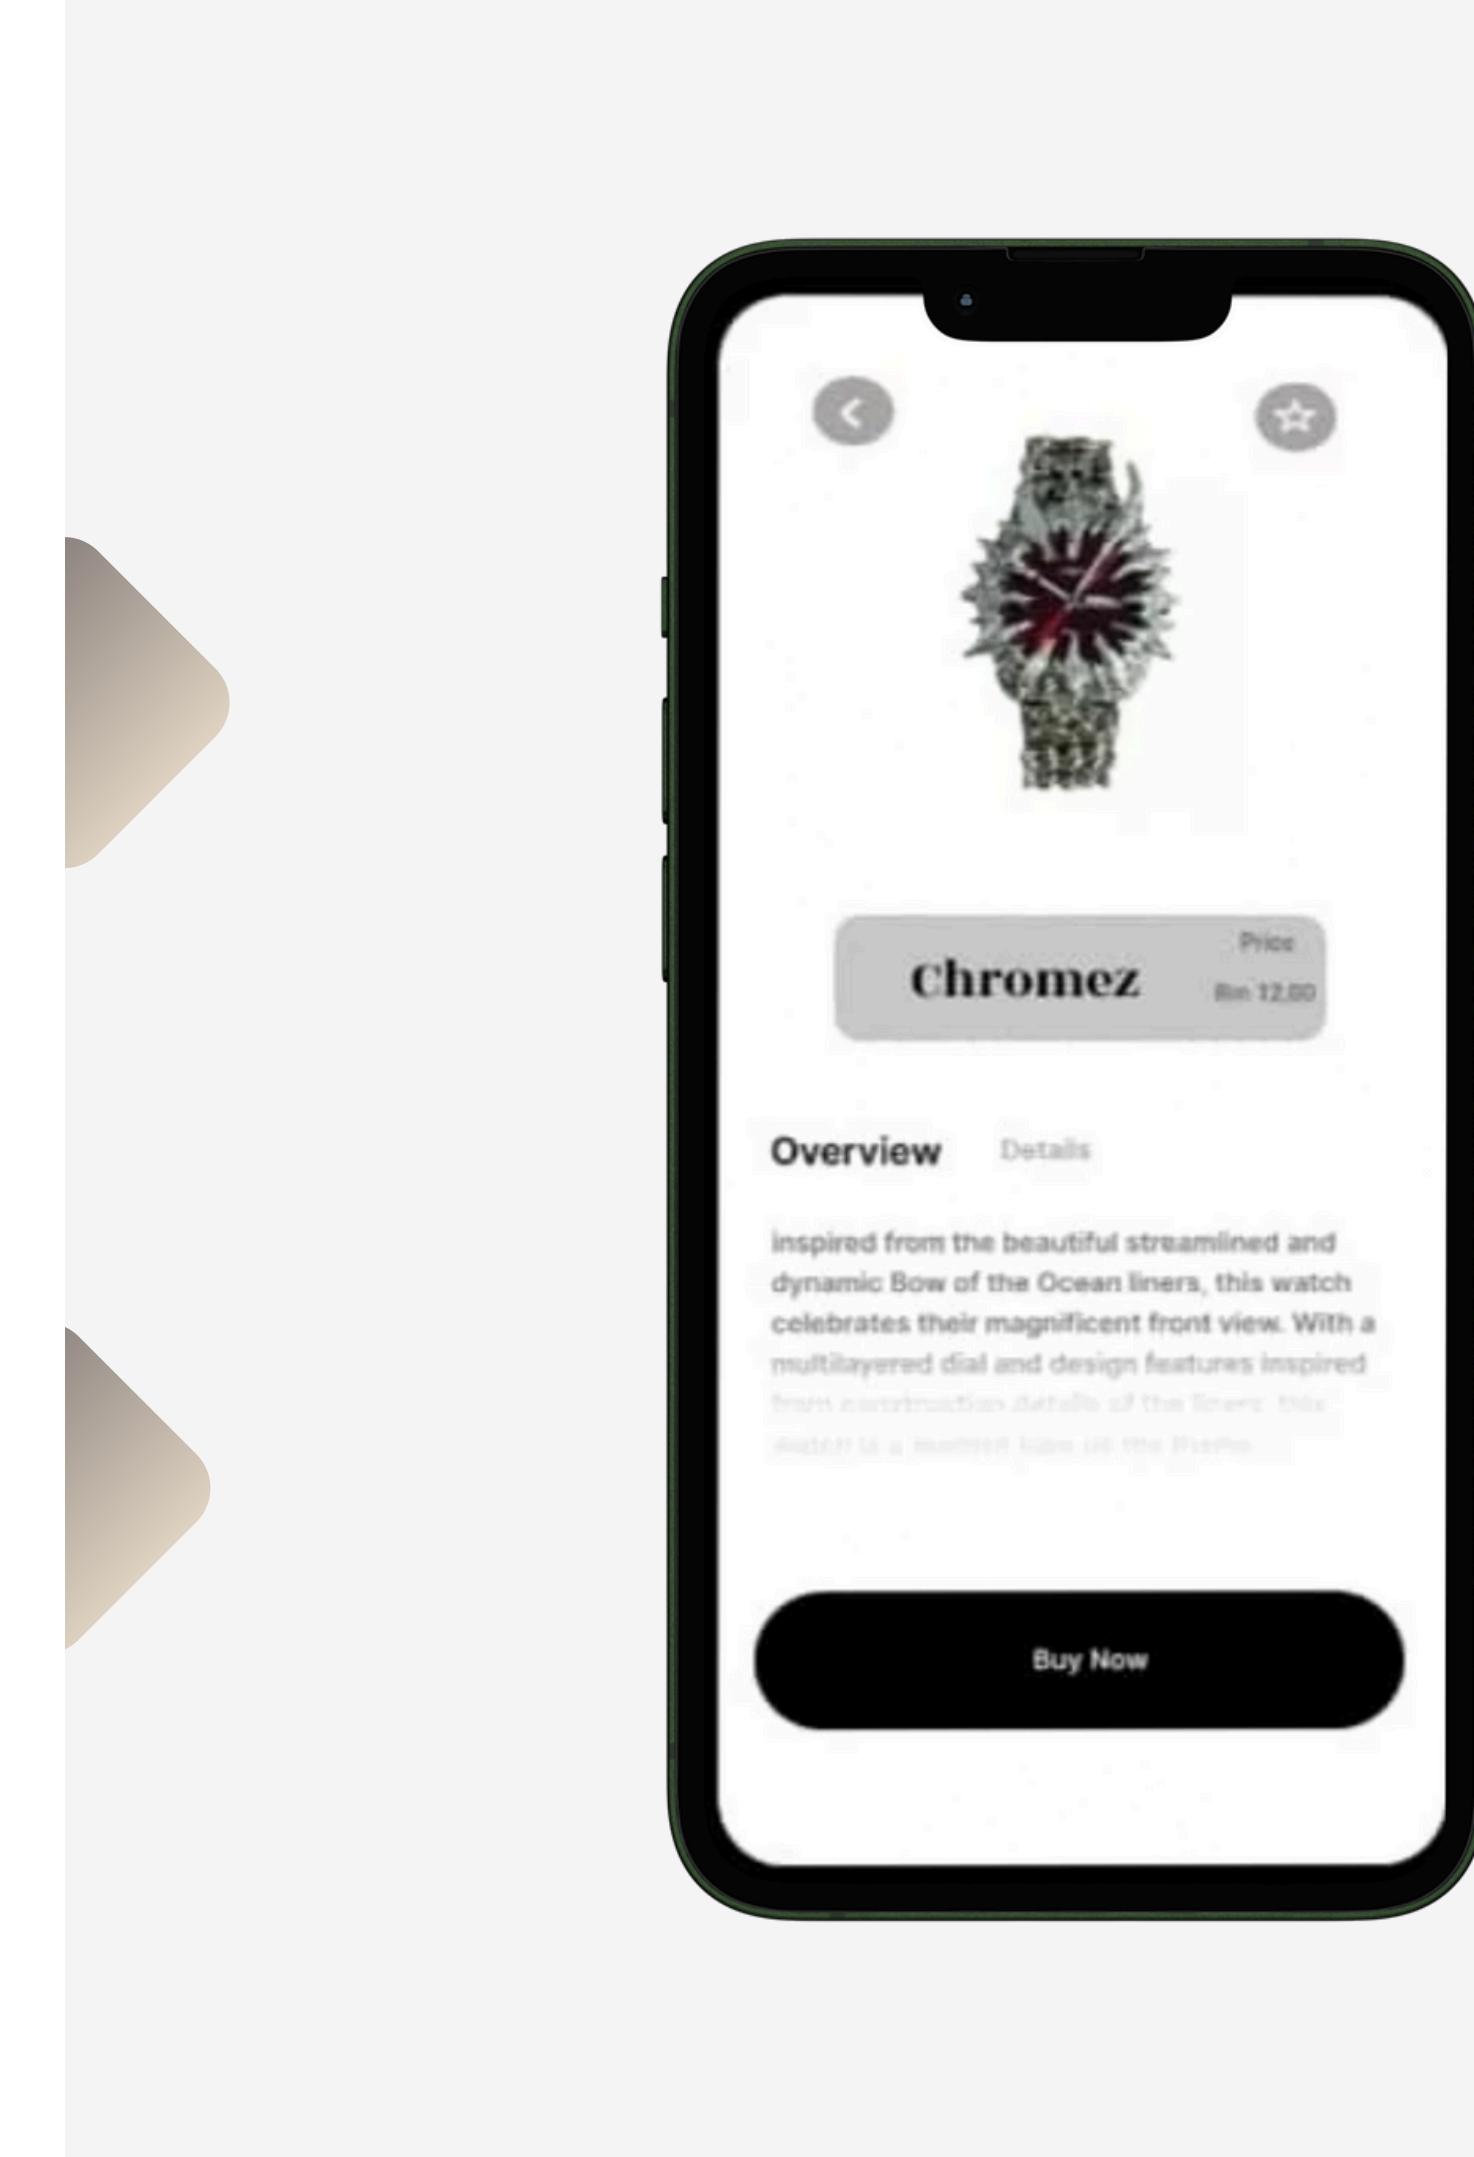

# Homepage

The home page is the main page of our application where user can access all our products online. Home page consists of your account's name and icon at the top of the page. It will also display our most popular products as of recently. The bottom of the page includes shopping cart button and watch button to access more product.

# OVERVIEW DETAILS PAGE

When user clicked on their desirable product, overview details page will pop-up. In this page, details of chosen product will be displayed for user to get to know more about the product. Picture as well as products' pricing will be shown to user on this page.

# ACCESSORIES PAGE

Accessories page is where user can access all available products.

Products will be shown based off of the availability of the product and will be shown based on the current season. Each design will be displayed with those of similar design closely.

# WISHLIST PAGE

Another page where user can have access to is the wishlist page. In this page, user can add products of which they are planning to have in the near future. Be it because they are still confused which design to choose from or they are still saving up money to buy their desired product.

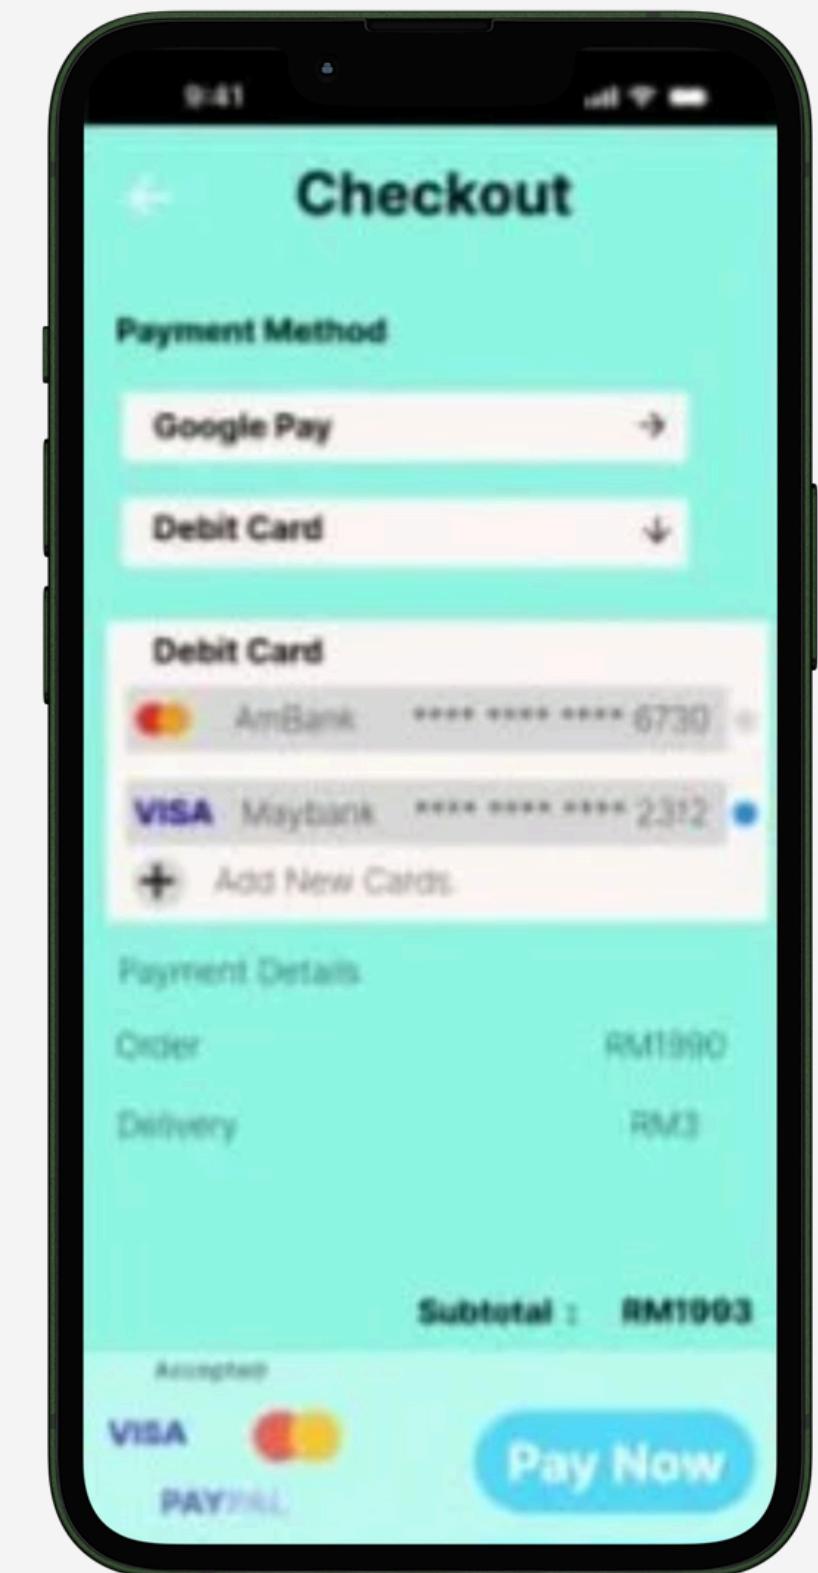

# CART PAGE

After having chosen which product they'd want to buy, user can then add the product to the shopping cart. In this page, the total price of the product will be displayed to the user and user can cancel a product if they have added a product accidentally.

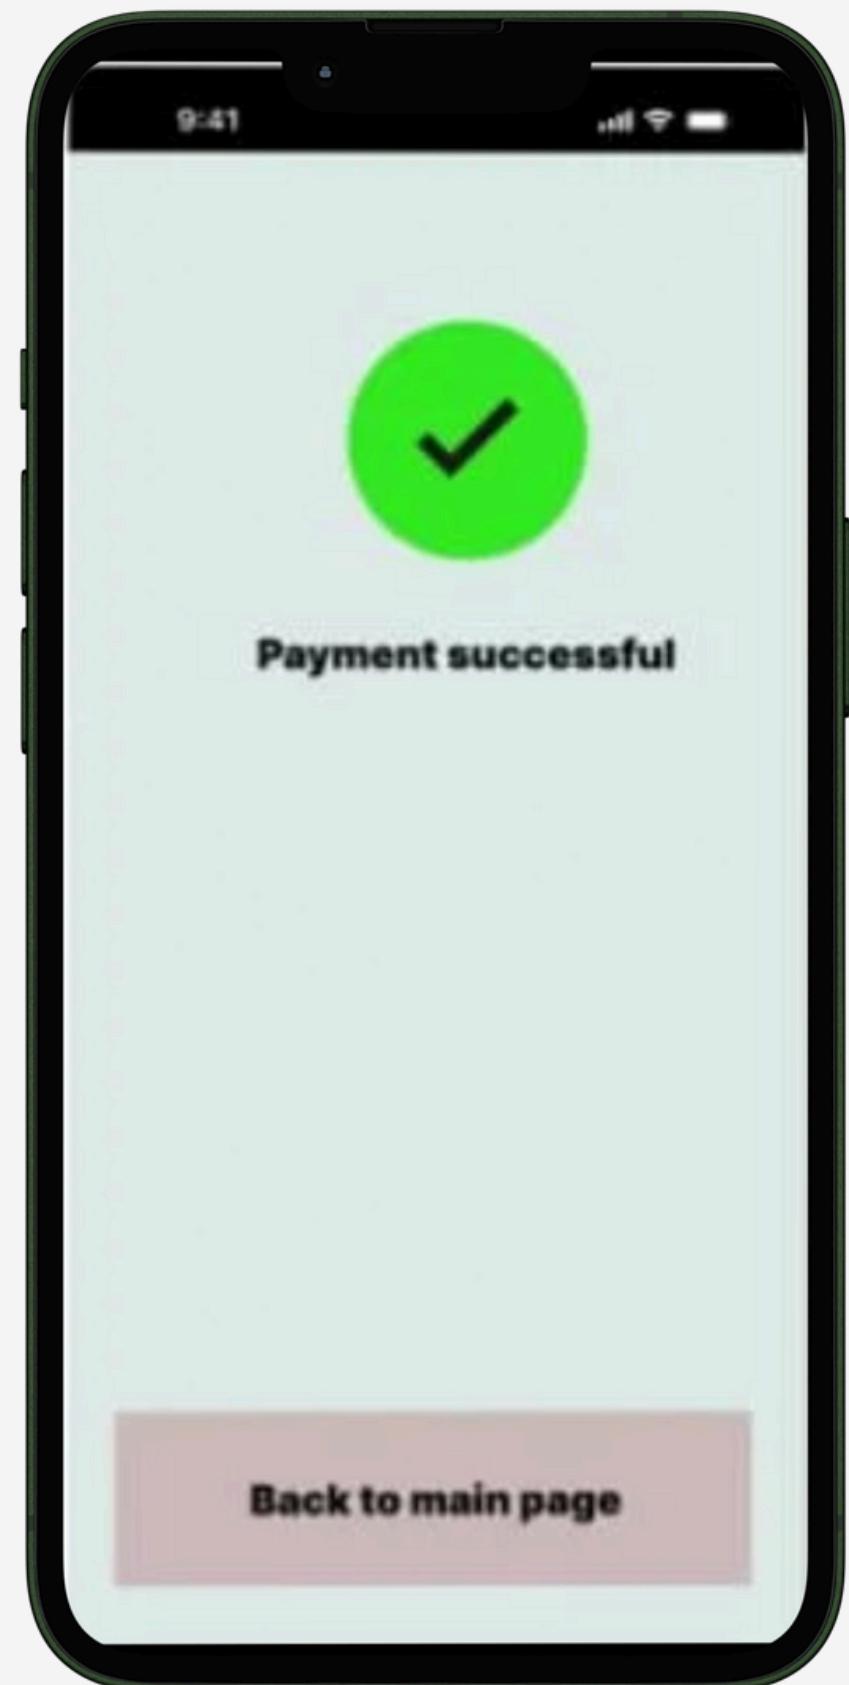

# CHECKOUT PAGE

After pressing the checkout button in the cart page, user will be brought to the checkout page. This page includes the type of payment we accept and user shall choose which method of payment they are paying with. The delivery charge will be shown to user in this page.

# ORDER PAGE

After paying the total amount, order page showing 'payment successful' will be displayed meaning all payment transaction have been done. User can then go back to the main page of the app to browse more of our product.

# Our Offered Services

We have decided to proceed with minimalist concept for the application to ease the usage of it to our customer. Ensuring that the usage is easy, customers will have a good impression of the product management even before buying it, a good first impression is what we as a group thrive for.
